John Deere Plows, Rod Breakers, Harrows,  
Corn Planters, Cultivators and Hoosier Drills.

A FULL LINE OF

Moline Wagons, Buggies and Spring Wagons.

AFTON.

INDIAN TERRITORY.

## Crumpton's Fate—A Warning to Young Men.

Fort Smith, June 30.—(Herald.)

Crumpton, alias Bood Dorr, was

hanged by the United States authorities

in the jail here this morning.

At an early hour the condemned man

was shaved and then dressed in a new

suit of clothes. Relatives called and

bade him good-bye and at 10 o'clock the

death warrant was read to the prisoner

in his cell.

About 300 people witnessed the hang-

ing. Crumpton made a statement, on

the gallows, saying that whiskey had

brought him to his present condition.

He warned those present, when they

took a glass of liquor, to look into it

and they would see there the hang-

man's nose. He protested his innoc-

ence to the last, saying that his ene-

mies had sworn his life away, and that

the real murderer would some day be

apprehended. His spiritual adviser,

the Rev. Mr. Williams, pastor of the

M. E. church, read a few verses from

the New Testament and offered a ferv-

ent prayer for the doomed man.

The black cap was adjusted, and at

10:30 the trap was sprung. The vic-

tim's neck was broken, and in six min-

utes the attending physician pro-

nounced life extinct. The body was

taken down and placed in a cheap pine

coffin. The relatives then took charge

of the body and will inter it at Brazos,

T. X., in the family burying ground.

The murder for which Bood Crumpton

paid the penalty was committed Novem-

ber 3, 1889, near Muskogee, Creek

county. The evidence against him was

all circumstantial but very strong. The

prosecution established the fact that on

Sunday Crumpton and Sam Morgan

started on horseback to visit some

young ladies, several miles away. Both

were riding horses belonging to Morgan,

who had a large corral in the neigh-

borhood. Late in the evening Crumpton

returned, leading the horse ridden away

by Morgan, and also having in posses-

sion the gun and overcoat of the de-

ceased. He stated that he and Morgan

had met a man in a buggy who had em-

ployed Morgan to go with him to Paw-

nee Agency in work, and that Morgan

had instructed him to take charge of

his horses and crops and other prop-

erty and take care of it until his re-

turn.

Seven weeks later the dead body of

Morgan was found some distance from

the road traveled by the two men on

the morning above mentioned. The

body was found in the morning of a

large tree. He had been shot in the

head, and from the position of the body

and the range of the bullet, it was

thought that he had been shot after he

got into the hole. On this evidence the

theory was advanced that Crumpton had

induced his companion to go down

into the hole by representing that there

was some whisky concealed there, and

that shot him.

As soon as the body of Morgan was

discovered, the friends of the dead man

caused the arrest of Crumpton, and

he was lodged in jail here the latter part

of December, 1889. At the trial the

prosecution traced Crumpton and his

victim all the way along the road to the

killings, and from that point in a round-

about way back to the place of slaying.

The only defense brought out was the

baro statement of the defendant, with

no evidence in support of it. He was

convicted on June 1, 1890, and sen-

## Swept Into the Torrent.

Atchison, Kas., June 30.—The house

of Pleasant Little, on Doniphan point,

last into river with its contents

yesterday afternoon. The house was

occupied by John McQueen and his

family, Little having with them. They

had vacated the house a few hours be-

fore it fell, taking with them on the

mainland. The house was

the current is too swift for them to

swim ashore. The neck across which

the water flows is about 150 yards wide,

and the stream about 100 yards wide.

Around the island thus formed it is

seven miles. The current across the

neck is about four feet deep, pitching

over a fall of six feet at the lower end,

causing a roar that can be heard two

miles away. The current has not yet

cut through the "gumbo." As long as

this tough event has been trying to

break through, the current cut through

the alluvial soil below, it would be only

a matter of a few hours until the great

volume of the river would be passing

through a new channel.

Between Atchison and Rushville the

Hannibal and St. Joseph and the Kansas

City, St. Joseph & Kansas City, Mo., are

covered with water in several

places. The Hannibal track is not safe

to use and the Kansas City will have to

abandon their line. The situation is

very serious. Between Rushville and the

river, not less than twenty-five farm

houses are surrounded by water, and

the crops are being destroyed. The

shocks of wheat that are yet above

water.

Robbed of His Roll.

Leavenworth, June 30.—Three

confidence men who swindled Farmer

Stephen Trice of Lathrop, Mo., out of

\$2,500 Friday had been in Leavenworth

for a week previously and conducted

Meney of the Rock Island thinks he

would know if he should see them

again. One of the men wore a heavy

board. While here they stopped at the

Delmonico.

Farmer Trice had a piece of land

about 40 acres. He had been told by

men represented themselves to be St.

Louis capitalists and made him an offer

of \$500 an acre, saying him \$1,000 down.

Trice, they told him that they had some

land near Lathrop that they would sell

at a bargain. Trice knew the land well

and was not surprised to find it to be

nothing but a swamp. He had been told

that the land was good, and he had

been told that the land was good, and

he had been told that the land was

good, and he had been told that the

land was good, and he had been told

that the land was good, and he had

been told that the land was good, and

he had been told that the land was

good, and he had been told that the

land was good, and he had been told

that the land was good, and he had

been told that the land was good, and

he had been told that the land was

good, and he had been told that the

land was good, and he had been told

that the land was good, and he had

been told that the land was good, and

he had been told that the land was

good, and he had been told that the

land was good, and he had been told

that the land was good, and he had

been told that the land was good, and

he had been told that the land was

good, and he had been told that the

land was good, and he had been told

that the land was good, and he had

## The Situation.

For many months the Kansas Farmer

has been much amused at the

press trying to persuade itself into the

belief that the farmers' alliance and in-

dustrial union is simply an auxiliary to

the democratic party. Many a smile

have we enjoyed as we calmly watched

the desperation with which these jour-

nalists attempted to misrepresent their

readers. As each and every member of

the alliance positively knew better; of

course the only converts to such sill-

iness could only come from those outside

of the organization, most of whom have

become too well posted to be longer im-

posed upon.

Now, dear, deluded friends of the old

party press, we will kindly inform you

that the farmers' alliance and indus-

trial union can possibly become an

auxiliary to any political party without

violating both the letter and spirit of its

constitution. It is a non-partisan

organization, and must remain so. But

while this is true, it is also a fact that

the organization is intensely political.

It is a school for the study of political

economy, independent of any polit-

ical party. It is a school for the study

of the questions of the day. It is

honestly "chewed to the bone," fa-

voring no one party more than the

other. It is a school for the study of

the questions of the day. It is
